Requirements specification: car maintenance tracking

Version 1.0 - Application for Martin Garage

1. Context

Martin Garage wants to track the servicing of its customers' vehicles. A Garage receives several Vehicles every day and carries out maintenance jobs. The application must replace the paper binder.

2. Definitions

Vehicle: road machine entrusted to the garage for servicing or repair.

Garage: workshop that receives vehicles and employs mechanics.

Tyre: rubber part fitted on a wheel of the vehicle.

Technical inspection: statutory inspection of a vehicle.

3. Requirements on vehicles

A Vehicle has a VIN number, a plate, a mileage and a purchase date. A Vehicle is fitted with Tyres.

A Sedan is a light Vehicle. A Sedan has a fiscal horsepower. A Truck is a heavy Vehicle.

4. Tyres

A Tyre is a Part. A Tyre has a reference, a size, a pressure and a manufacturing date.
The Garage replaces the Tyre when the tread depth is insufficient.

5. Technical inspection

The Technical inspection is mandatory every two years. A Technical inspection concerns a Vehicle.

A Technical inspection has a date, a result and an approved centre.

6. Competency questions

Which vehicles have a technical inspection to renew this month?

Which tyres are fitted on a given vehicle?

What is the date of the last technical inspection of a vehicle?

Which mechanic carried out each job?

Which sedans exceed 100,000 kilometres?
